EXPERIENCE

Remitano — Ruby on Rails Developer

May 2020 - Present

Remitano is the leading cryptocurrency exchange in Vietnam. At Remi, I have learned to write clean and test-driven code to deliver users the best experience using our product. My works include:

- building a landing page with **React** that helps secure the company's marketing campaign in seven new markets.
- maintaining and developing the main application and the administration site with **Ruby on Rails**.

Floating Cube Studio — Ruby on Rails Developer

Sept. 2019 - May 2020

The studio's main product is EPOS, a point of sales system and inventory management for retail stores. My contributions were:

- worked on the inventory website with **Rails** and **AngularJS**.
- developed a feature to sync purchases from Shopify online stores to our database.
- organized a workshop: "Switching from VSCode to Vim".

Employment Hero — Software Development Intern

June 2019 - Aug. 2019

Employment Hero provides HR software and payroll solution. During my internship here, I developed a web application with **Rails** and **React** for the company's annual performance review.

SIDE PROJECTS

github.com/tuang3142/1337

My **Ruby** and **Python** solutions for leetcode, a weekly coding contest.

github.com/tuang3142/sudoku

A Sudoku solver written in **Ruby** to practice test-driven development.

github.com/tuang3142/cart

An ongoing project to showcase test-driven development with **Rails**.

SKILLS

Web development with **Ruby on Rails** and **React**.

Algorithmic problem solving with **Python** and **Ruby**.

CODING CONTEST ACTIVITIES

2015 National Olympiad in Informatics : 3rd place
